

WHAT CHARACTERISTICS SHOULD THE **IDEAL CONNECTOR** FOR **NEONATAL ENTERAL NUTRITION** HAVE?

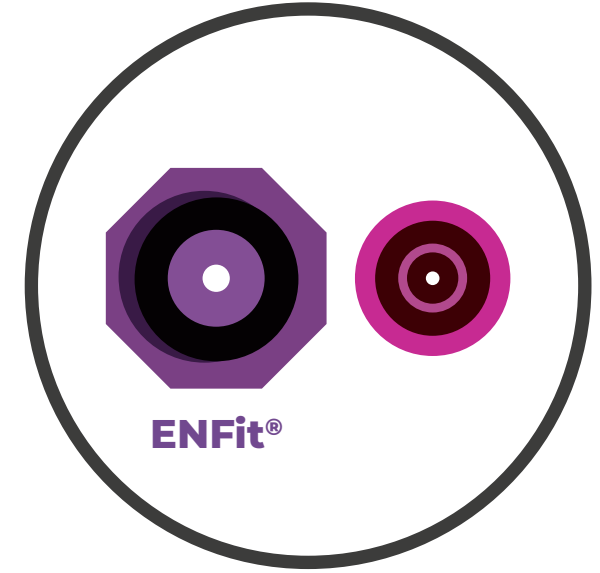

SAFE

- ▶ **Incompatible with Luer connectors** and other small diameter connectors used in other applications
- ▶ Enables a reliable connection between components **without leaks or cracks**

ADAPTED FOR PREMATURES

- ▶ With the **smallest possible connectors**
- ▶ With the **lightest possible connectors**
- ▶ In premature infants, **a large and heavy connection carries risks of skin injuries** or untimely tube displacement

ACCURATE

- ▶ **Internal dead space less than 0.1 mL**
- ▶ Generation of **fluid displacement less than 0.05 mL** during connection
