

MICROSELDINGER TECHNIQUE: SET MICROSELDINGER

1 Needle puncture

2 Inserting the guidewire through the needle cannula

3 Remove the needle while keeping the guidewire inside the vessel

4 Insertion of the insertion aid into the guideway

5 Advance the dilator with the aid through the guidewire

6 Remove the aid and continue dilator insertion

7 Remove the dilator together with the nitinol guide

8 Thread the catheter using non-toothed forceps

9 Peel-remove the peelable cannula and ensure proper catheter placement
