

HYPOTENSION

REMEMBER: Patient should be fully ventilated.
Heart rate should be regular. No arrhythmias.

Do I increase Inotropes?

Cardiac Index - 2.5 - 4 L/min
Inotropes if low
(Adrenaline / Dopamine / Milrinone / Dobutamine)

Do I give fluids?

Pulse Pressure Variance (PPV)
< 10% Unlikely to be fluid responsive
> 15% Likely to be fluid responsive
(10 - 15% - Grey area)
